Project: SEA Building Addition
Subject: SSp1 Contractor Declaration

To Whom It May Concern,

This letter serves as confirmation that the Erosion & Sedimentation Control plan was carried out appropriately for the project.

The ESC plan was maintained throughout the duration of the project, from initial site mobilization through project closeout. Specific control measures included silt fencing, triangular filter dikes, curb and inlet protection, and watering for dust control. The implementation of the plan was maintained daily by the general contractor.

Sincerely,

A handwritten signature in black ink, appearing to read 'Gilbert Martinez', with a long horizontal flourish extending to the right.

Gilbert Martinez
