LEED v4 BD+C: New Construction

Bicycle Facilities

Unit Type: ● IP (inch-pound)   ○ SI (International System of Units)

Bicycle Network

Select one of the following.

The project has a functional entry and/or bicycle storage within 200 yd (180 m) of a bicycle network that connects to the following:

○ At least 10 diverse uses

○ A school or employment center, if the project total floor area is 50% or more residential

○ A bus rapid transit stop, passenger, rail station, or ferry terminal

Upload a vicinity map that shows routes along a bicycle network to the destination(s) selected. The map must identify use type, bicycling distance to the destination(s) from the project boundary (must be within 3 mi [4,800 m]), and each segment of the bicycling network identified by type according to the bicycle network definition.

For projects with planned bicycle networks

Upload a capital improvement plan or equivalent document signed on developer letterhead that confirms that the bicycle network will be fully funded by the date of the certificate of occupancy and is scheduled for completion within one year of that date.

Bicycle Storage and Shower Rooms

Upload a site map that includes main and functional building entrances, short-term bicycle storage and long-term bicycle storage, walking distance from short-term storage to the main entrance and from long-term storage to a functional entrance. Label bicycle storage according to type and capacity.

Select one of the following:

○ **Case 1. Commercial or institutional projects**

○ **Case 2. Residential projects**

○ **Case 3. Mixed-use projects (both commercial and residential)**

Special Circumstances

Describe the circumstances limiting the project team's ability to provide the submittals required in this form. Be sure to reference what additional documentation has been provided, if any. Non-standard documentation will be considered upon its merits. (Optional)

Upload any additional documentation that supports the claim to special circumstances. (Optional)
